Technical Skills

- **Languages:** Java (Intermediate), Python (Basic)
- **Core CS:** Data Structures, Algorithms, Problem Solving, Object-Oriented Programming (OOP), DBMS, Computer Networks
- **Web Development:** HTML, CSS, JavaScript, MERN Stack, EJS, Flask
- **Databases:** MySQL, MongoDB
- **Frameworks & Tools:** Node.js, Express.js, React.js, REST APIs, Github, Docker, PostMan
- **Machine Learning:** Python-based ML, Data Preprocessing, Model Training, LangChain, RAG
- **Financial Markets:** Futures and Options, Forex (XAUUSD,GBPUSD) , Technical Analysis
- **Trading Strategies:** Fibonacci Retracement, Support Resistance, Trend Analysis, Price Action

Academic Projects

MediBot – AI-Powered Healthcare Chat Application
- Developed a medical chatbot using OpenAI GPT and LangChain for context-aware responses.
- Processed and indexed **5859** document chunks as vector embeddings in Pinecone, enabling efficient semantic search and retrieval.
- Implemented RAG (Retrieval-Augmented Generation) pipeline with Pinecone for accurate medical information retrieval.
- Built backend using Flask with embedding pipelines for efficient querying.
- Designed a symptom-based system providing insights and recommendations.
- GitHub: MediBot Repo

Vision-GPT – AI-Powered Chat Application
- Developed a GPT-powered chat assistant using OpenAI API for real-time responses.
- Built a full-stack MERN application with scalable backend using Node.js, Express, and MongoDB.
- Implemented real-time typing effect and persistent chat storage, improving session continuity across user visits.
- Designed a responsive UI and optimized API call handling to reduce redundant requests and latency.
- Implemented user authentication and secure API integration using environment variables to protect sensitive credentials and application data.
- GitHub: VisionGPT Repo

Vibe AI Website Builder – AI-Powered Website Generation Platform
- Developed an AI-powered website builder using Next.js 14 and TypeScript for scalable web applications.
- Integrated OpenAI GPT-4 API for intelligent content generation and dynamic UI creation.
- Built a pipeline that parses GPT-4 generated layout descriptions and converts them directly into deployable React components.
- Containerized the application using **Docker**, ensuring consistent environments and simplifying deployment.
- GitHub: Vibe AI Website Builder Repo

Education

VIT-AP University 2027 (Expected)
B.Tech, Computer Science & Engineering — CGPA: 9.08

Atreyee D.A.V Public School (CBSE) 2023
Class XII — 86.8%

Atreyee D.A.V Public School (CBSE) 2021
Class X — 91.4%

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — View Certificate
- Machine Learning A-Z: AI-Python — View Certificate
